What does the Fund invest in?

Investment objectives

The fundamental investment objective is to maximize total return through both interest income and capital appreciation by tracking the performance of the DEX Universe Bond Index (“Universe Index”). The Universe Index is comprised of Canadian investment-grade bonds which mature in more than one year.

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser seeks to track the Universe Index by using a stratified sampling indexing technique. This method involves selecting a subset of bonds from each component of the Universe Index and holding them in the same proportion as the components of the Universe Index. The overall attributes of the portfolio are closely matched to those of the Universe Index and the portfolio is broadly diversified. The Fund may also purchase index participation units and specified derivative instruments, such as options, futures and forward contracts, whose value is based on all, or part of, the Universe Index. The Fund may hold money market instruments or cash to meet its obligations under the derivatives instruments.

The Fund may engage in securities lending, repurchase or reverse repurchase transactions in a manner consistent with its investment objectives and as permitted by Canadian securities regulatory authorities. For more information, see ***Securities lending, repurchase and reverse repurchase transactions*** in *Your guide to understanding the Fund Profile* in the first part of this document.

We may change the Fund’s investment strategies at our discretion without notice or approval.

What are the risks of investing in the Fund?

Risks of investing in the Fund may include:

- concentration risk
- credit risk
- derivatives risk
- interest rate risk
- large investor risk
- repurchase and reverse repurchase agreements risk
- securities lending risk
- series risk
- tracking risk

These and other risks, which may also apply to the Fund, are described under the heading ***Fund-specific risks*** in the first part of this document.

This document provides specific information about the TD Canadian Bond Index Fund. It should be read in conjunction with the rest of the simplified prospectus of the TD Mutual Funds dated July 21, 2010. This document and the document that provides general information about the TD Mutual Funds together constitute the simplified prospectus.

Who should invest in the Fund?

The Fund may be suitable for medium to long-term investors who:

- want to track the returns of a major benchmark bond index
- require income and can accept some interest rate risk to achieve moderate capital growth
- are contributing to the income component of a diversified portfolio
- are willing to accept a low level of risk

Distribution policy

The Fund may distribute net income monthly or at other times and distributes net income and net realized capital gains annually in December.

Fund expenses indirectly borne by investors

Mutual funds pay for some expenses out of fund assets. That means investors in a mutual fund indirectly pay for these expenses through lower returns.

The table below is intended to help you compare the cumulative cost of investing in this Fund with the cost of investing in other mutual funds. This example assumes that: (i) you invest \$1,000 in units of the Fund for the time periods indicated; (ii) your investment has an annual 5% return; and (iii) the Fund's MER for the Series units during the 10-year period remains the same as that incurred in its last financial year.

Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 year	3 years	5 years	10 years
Investor Series (\$)	8.10	25.53	44.74	101.85
e-Series (\$)	4.92	15.51	27.19	61.88
Institutional Series (\$)	3.69	11.63	20.39	46.41

See **Fees and expenses** in the first part of this document for more information on the costs of investing in the Fund that are not included in the calculation of the MER.

This document provides specific information about the TD Canadian Bond Index Fund. It should be read in conjunction with the rest of the simplified prospectus of the TD Mutual Funds dated July 21, 2010. TD Balanced Index Fund

Fund details

Fund type	Canadian Balanced
Securities offered	Units of a mutual fund trust: Investor Series e-Series
Start date	Investor Series – June 29, 1998 e-Series – Not issued to the public prior to the date of this prospectus The Fund was formed on June 8, 1998.
Portfolio adviser	TD Asset Management Inc. (TDAM)
Management fee	Investor Series – Up to 0.80%* (excluding GST and HST) e-Series – Up to 0.80%* (excluding GST and HST)

* The Fund invests in underlying funds which pay a management fee. However, no management fees are payable by the Fund that, to a reasonable person, would duplicate a fee payable by the underlying funds for the same service.

What does the Fund invest in?

Investment objectives

The fundamental investment objective is to maximize long-term growth while seeking to preserve capital by investing in a balanced portfolio of equities, bonds and short-term instruments, primarily Canadian, but also including U.S. and international securities.

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser uses strategic asset allocation to seek to achieve the fundamental investment objective of the Fund. The Fund's asset mix will generally be 40-60% in fixed income and 40-60% in equities.

The portfolio adviser:

- monitors allocations to the underlying funds to ensure that they are made in accordance with the asset class ranges set out above; and
- considers, in determining the asset allocations to the underlying funds, each underlying fund's investment objective and strategies, past performance and historical volatility in the context of a diversified holding of underlying funds suitable for the Fund.

The Fund may invest in foreign securities to an extent that will vary from time to time but is not typically expected to exceed 30% of its net assets at the time that foreign securities are purchased.

TDAM may vary the percentage of the Fund's holdings in any mutual fund or change the mutual funds in which the Fund invests by adding or removing mutual funds, in each case, without notice to unitholders.

A unitholder of the Fund does not have ownership rights in units of any underlying fund held by the Fund. Where TDAM is the manager of both the Fund and an underlying fund in which the Fund has invested, TDAM will not exercise the right to vote that is attributable to the securities of the underlying fund. TDAM may arrange for these securities to be voted by unitholders of the Fund. However, given the costs and complexity of doing so, TDAM may not arrange for flow-through of voting rights.

We may change the Fund's investment strategies at our discretion without notice or approval.

What are the risks of investing in the Fund?

Risks of investing in the Fund may include:

- commodity risk
- concentration risk
- credit risk
- derivatives risk
- equity risk
- foreign currency risk
- fund-of-funds risk
- income trust risk
- interest rate risk
- international market risk
- large investor risk (as at June 23, 2010, one unitholder held 22.74% of the units of the Fund)

This document provides specific information about the TD Balanced Index Fund. It should be read in conjunction with the rest of the simplified prospectus of the TD Mutual Funds dated July 21, 2010. This document and the document that provides general information about the TD Mutual Funds together constitute the simplified prospectus.

- repurchase and reverse repurchase agreements risk
- securities lending risk
- series risk
- tracking risk

These and other risks, which may also apply to the Fund, are described under the heading *Fund-specific risks* in the first part of this document.

Who should invest in the Fund?

The Fund may be suitable for medium to long-term investors who:

- prefer the simplicity of investing in a single fund that incorporates exposure to bonds, and domestic and foreign equities
- are willing to accept a low to moderate level of risk

Distribution policy

The Fund may distribute net income quarterly or at other times and distributes net income and net realized capital gains annually in December.

Fund expenses indirectly borne by investors

Mutual funds pay for some expenses out of fund assets. That means investors in a mutual fund indirectly pay for these expenses through lower returns.

The table below is intended to help you compare the cumulative cost of investing in this Fund with the cost of investing in other mutual funds. What does the Fund invest in?

Investment objectives

The fundamental investment objective is to provide long-term growth of capital primarily by purchasing Canadian equity securities to track the performance of the S&P/TSX Composite Total Return Index (“S&P/TSX Composite Index”).

The S&P/TSX Composite Index is comprised of Canadian issuers traded on the Toronto Stock Exchange (TSX).

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser seeks to achieve the fundamental investment objective of the Fund primarily by replicating the S&P/TSX Composite Index. Each security in the S&P/TSX Composite Index is held by the Fund in close tolerance to its index weight so that the performance of the Fund closely tracks the performance of the S&P/TSX Composite Index. The Fund strives to be fully invested, maintaining very low levels of cash, by temporarily owning exchange-traded funds and transacting in specified derivative instruments, such as options, futures and forward contracts, whose value is based on all, or part of, the S&P/TSX Composite Index. The Fund may hold money market instruments or cash to meet its obligations under the derivatives instruments.

The Fund may invest in foreign securities to an extent that will vary from time to time but is not typically expected to exceed 30% of its net assets at the time that foreign securities are purchased.

What does the Fund invest in?

Investment objectives

The fundamental investment objective is to provide long-term capital appreciation similar to the performance of the Dow Jones Industrial AverageSM Total Return Index (“DJIA Index”) by investing primarily in the equity securities of companies which are included in the DJIA Index.

The DJIA Index is comprised of 30 U.S. blue-chip companies.

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser seeks to achieve the fundamental investment objective of the Fund primarily by replicating the DJIA Index in US\$ terms. Each security in the DJIA Index is held by the Fund in close tolerance to its index weight so that the performance of the Fund closely tracks the performance of the DJIA Index. The Fund strives to be fully invested, maintaining very low levels of cash, by temporarily owning exchange-traded funds and transacting in specified derivative instruments, such as options, futures and forward contracts, whose value is based on the DJIA Index. What does the Fund invest in?

Investment objectives

The fundamental investment objective is to provide long-term growth of capital by primarily purchasing U.S. equity securities to track the performance of The Standard & Poor's 500 Total Return Index ("S&P 500 Index").

The S&P 500 Index is comprised of 500 widely-held U.S. issuers.

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser seeks to achieve the fundamental investment objective of the Fund primarily by replicating the S&P 500 Index. Each security in the S&P 500 Index is held by the Fund in close tolerance to its index weight so that the performance of the Fund closely tracks the performance of the S&P 500 Index. The number of securities comprising the S&P 500 Index in which the Fund actually invests from time to time will depend upon the size and value of the assets of the Fund. The Fund will therefore be rebalanced with a frequency and degree of precision that seeks to track the S&P 500 Index as closely as possible consistent with minimizing trading costs. The Fund strives to be fully

invested, maintaining very low levels of cash, by temporarily owning exchange-traded funds and transacting in specified derivative instruments, such as options, futures and forward contracts, whose value is based on all, or part, of the S&P 500 Index. The Fund may hold money market instruments or cash to meet its obligations under the derivatives instruments.

The Fund may engage in securities lending, repurchase or reverse repurchase transactions in a manner consistent with its investment objectives and as permitted by Canadian securities regulatory authorities. For more information, see *Securities lending, repurchase and reverse repurchase transactions* in *Your guide to understanding the Fund Profile* in the first part of this document.

We may change the Fund's investment strategies at our discretion without notice or approval.

What are the risks of investing in the Fund?

Risks of investing in the Fund may include:

- commodity risk
- concentration risk
- derivatives risk
- equity risk
- foreign currency risk
- large investor risk (as at June 23, 2010, one unitholder held 34.38% of the units of the Fund)

This document provides specific information about the TD U.S. Index Fund. It should be read in conjunction with the rest of the simplified prospectus of the TD Mutual Funds dated July 21, 2010. - repurchase and reverse repurchase agreements risk
- securities lending risk
- series risk
- tracking risk

These and other risks, which may also apply to the Fund, are described under the heading *Fund-specific risks* in the first part of this document.

Who should invest in the Fund?

The Fund may be suitable for medium to long-term investors who:

- want to track the returns of a major U.S. equity index
- are contributing to the growth component of a diversified portfolio
- are willing to accept a moderate level of risk

Distribution policy

The Fund distributes net income and net realized capital gains annually in December.

Fund expenses indirectly borne by investors

Additional information

The Fund is not sponsored, endorsed, sold or promoted by Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P"). S&P makes no representation or warranty, express or implied, to the unitholders of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly or the ability of the S&P 500 Index to track general stock market performance. S&P's only relationship to TD Bank is the licensing of certain trademarks and trade names of S&P and of the S&P 500 Index which is determined, composed and calculated by S&P without regard to TD Bank or the Fund. What does the Fund invest in?

Investment objectives

The fundamental investment objective is to seek to achieve long-term capital growth similar to the performance of one or more generally recognized U.S. equity market indices. The Fund also seeks to eliminate substantially the Fund's foreign currency exposure.

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser seeks to achieve the fundamental investment objective of the Fund by primarily investing in units of TD U.S. Index Fund (the "Underlying Fund") and using derivative contracts, on an ongoing basis, to hedge substantially the Fund's foreign currency exposure. This hedging strategy seeks to protect the Fund against losses from declines in the value of foreign currencies against the Canadian dollar. As a result of this strategy, the Fund will not benefit from increases in the value of foreign currencies against the Canadian dollar. Under certain market conditions, cash and short-term securities may be held within the portfolio.

The Fund may also use specified derivatives, such as futures contracts, for non-hedging purposes to obtain investment exposure pending paying amounts due under foreign currency forward contracts.

The portfolio adviser of the Underlying Fund seeks to achieve the Underlying Fund's fundamental investment objective primarily by replicating The Standard & Poor's 500 Total Return Index ("S&P 500 Index"). The number of securities comprising the S&P 500 Index in which the Underlying Fund actually invests from time to time will depend upon the size and value of the assets of the Underlying Fund. The Underlying Fund will be rebalanced with a frequency and degree of precision that seeks to track the S&P 500 Index as closely as possible consistent with minimizing trading costs. The Underlying Fund strives to be fully invested, maintaining very low levels of cash, by temporarily owning exchange-traded funds and transacting in specified derivative instruments, such as options, futures and forward contracts, whose value is based on all, or part, of the S&P 500 Index. The Underlying Fund may hold money market instruments or cash to meet its obligations under the derivatives instruments.

For more information, see the Fund Profile for the Underlying Fund.

This document provides specific information about the TD U.S. Index Currency Neutral Fund. It should be read in conjunction with the rest of the simplified prospectus of the TD Mutual Funds dated July 21, 2010. This document and the document that provides general information about the TD Mutual Funds together constitute the simplified prospectus.

A unitholder of the Fund does not have ownership rights in securities of the Underlying Fund. Where TDAM is the manager of both the Fund and the Underlying Fund in which the Fund has invested, TDAM will not exercise the right to vote that is attributable to the securities of the Underlying Fund. TDAM may arrange for these securities to be voted by unitholders of the Fund. However, given the costs and complexity of doing so, TDAM may not arrange for a flow-through of voting rights.

We may change the Fund’s investment strategies at our discretion without notice or approval.

What are the risks of investing in the Fund?

Risks of investing in the Fund may include:

- commodity risk
- concentration risk
- derivatives risk
- equity risk
- fund-of-funds risk
- large investor risk
- repurchase and reverse repurchase agreements risk
- securities lending risk
- series risk
- tracking risk

These and other risks, which may also apply to the Fund, are described under the heading *Fund-specific risks* in the first part of this document.

Who should invest in the Fund?

The Fund may be suitable for medium to long-term investors who:

- want to track the returns of a major U.S. equity index
- are contributing to the growth component of a diversified portfolio without substantial foreign currency exposure
- are willing to accept a moderate level of risk

This Fund is generally intended to be held within a Registered Plan because most of its earnings are considered regular income, which is taxed at your highest marginal rate.

Investors considering investing outside of a Registered Plan should carefully consider their tax situation before buying units of the Fund.

Distribution policy

The Fund distributes net income and net realized capital gains, if any, annually in December. The Fund reports all income and capital gains and losses from derivative instruments on income account.

Fund expenses indirectly borne by investors

Mutual funds pay for some expenses out of fund assets. That means investors in a mutual fund indirectly pay for these expenses through lower returns.

The table below is intended to help you compare the cumulative cost of investing in this Fund with the cost of investing in other mutual funds. This example assumes that: (i) you invest \$1,000 in units of the Fund for the time periods indicated; (ii) your investment has an annual 5% return; and (iii) the Fund’s MER for the Series units during the 10-year period remains the same as that incurred in its last financial year.

Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 year	3 years	5 years	10 years
Investor Series (\$)	8.61	27.14	47.58	108.30
e-Series (\$)	4.92	15.51	27.19	61.88
Institutional Series (\$)	3.69	11.63	20.39	46.41

See *Fees and expenses* in the first part of this document for more information on the costs of investing in the Fund that are not included in the calculation of the MER.

Additional information

The Fund is not sponsored, endorsed, sold or promoted by Standard & Poor’s, a division of The McGraw-Hill Companies, Inc. (“S&P”). S&P makes no representation or warranty, express or implied, to the unitholders of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly or the ability of the S&P 500 Index to track general stock market performance. S&P’s only relationship to TD Bank is the licensing of certain trademarks and trade names of S&P and of the S&P 500 Index which is determined, composed and calculated by S&P without regard to TD Bank or the Fund. S&P has no obligation to take the needs of TD Bank or the unitholders of the Fund into consideration in determining, composing or calculating the S&P 500 Index.

What does the Fund invest in?

Investment objectives

The fundamental investment objective of the Fund is to provide long-term capital appreciation similar to the performance of the Nasdaq-100 Index®. The Nasdaq-100 Index® is comprised of the largest and most actively traded companies on the Nasdaq stock market.

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser seeks to achieve the fundamental investment objective of the Fund primarily by replicating the Nasdaq-100 Index® in US\$ terms. The Nasdaq-100 Index® is comprised of the largest and most actively traded companies on the Nasdaq stock market and is heavily weighted in technology stocks. Each security in the Nasdaq-100 Index® is held by the Fund in close tolerance to its index weight so that the performance of the Fund closely tracks the performance of the Nasdaq-100 Index® (US\$). The Fund uses foreign currency forward contracts to hedge the currency exposure. The Fund strives to be fully invested, maintaining low levels of cash, by temporarily owning exchange-traded funds and transacting in specified derivative instruments, such as options, futures and forward contracts, whose value is based on the Nasdaq-100 Index®. The Fund may hold money market instruments or cash to meet its obligations under the derivatives instruments.

The Fund may engage in securities lending, repurchase or reverse repurchase transactions in a manner consistent with its investment objectives and as permitted by Canadian securities

regulatory authorities. For more information, see *Securities lending, repurchase and reverse repurchase transactions* in *Your guide to understanding the Fund Profile* in the first part of this document.

In the most recent twelve-month period ending July 7, 2010, Apple Computer Inc. (“Apple Inc.”) represented more than 10% of the Nasdaq-100 Index®. The maximum percentage that Apple Inc. represented of the Nasdaq-100 Index® during this twelve-month period was 20.18%. As of July 7, 2010, Apple Inc. represented 19.96% of the Nasdaq-100 Index®.

We may change the Fund’s investment strategies at our discretion without notice or approval.

What are the risks of investing in the Fund?

Risks of investing in the Fund may include:

- concentration risk
- derivatives risk
- equity risk
- large investor risk
- repurchase and reverse repurchase agreements risk
- securities lending risk
- series risk
- specialization risk
- tracking risk

In the twelve-month period ending July 7, 2010, more than 10% of the net assets of the Fund were invested in common shares of Apple Inc. The maximum percentage of net assets of the Fund invested in the securities of this issuer during this twelve-month period was 19.76%. The Fund may have experienced increased concentration risk as a result of this investment.

What does the Fund invest in?

Investment objectives

The fundamental investment objective is to track the Morgan Stanley Capital International Europe, Australasia and Far East Index (“MSCI EAFE Index”).

The MSCI EAFE Index is a broadly diversified index consisting of equity securities of companies domiciled in developed markets outside the U.S. and Canada.

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser seeks to achieve the fundamental investment objective of the Fund by using a stratified sampling indexing technique on the MSCI EAFE Index. This method involves the selection of a subset of securities from the MSCI EAFE Index so that the overall attributes of the portfolio are closely matched to the MSCI EAFE Index. The Fund strives to be fully invested, maintaining very low levels of cash, by temporarily owning exchange-traded funds, closed-end country funds and equity securities, and by transacting in specified derivative instruments, such as options, futures and forward contracts, based on all or part of the MSCI EAFE Index. The Fund may hold money market instruments or cash to meet its obligations under the derivatives instruments.

Only stocks within, or to be added to, the MSCI EAFE Index, will be purchased; however, the number of stocks purchased, and the proportion of each, will be chosen to optimize performance tracking while minimizing costs having regard to the size of the Fund.

The Fund may engage in securities lending, repurchase or reverse repurchase transactions in a manner consistent with its investment objectives and as permitted by Canadian securities regulatory authorities. What does the Fund invest in?

Investment objectives

The fundamental investment objective is to track the performance of the Morgan Stanley Capital International Europe Gross Dividend Index (“MSCI Europe Index”).

The MSCI Europe Index is a diversified index of about 600 widely held companies in the developed countries in Europe.

The fundamental investment objective may only be changed with the approval of a majority of unitholders, given at a meeting called for that purpose.

Investment strategies

The portfolio adviser seeks to achieve the fundamental investment objective of the Fund primarily by replicating the MSCI Europe Index. Each security in the MSCI Europe Index is held by the Fund in close tolerance to its index weight so that the performance of the Fund closely tracks the performance of the MSCI Europe Index. The Fund strives to be fully invested, maintaining very low levels of cash, by temporarily owning exchange-traded funds and transacting in specified derivative instruments, such as options, futures and forward contracts, whose value is based on all, or part, of the MSCI Europe Index. The Fund may hold money market instruments or cash to meet its obligations under the derivatives instruments.

The Fund may engage in securities lending, repurchase or reverse repurchase transactions in a manner consistent with its investment objectives and as permitted by Canadian securities regulatory authorities. For more information, see *Securities lending, repurchase and reverse repurchase transactions* in *Your guide to understanding the Fund Profile* in the first part of this document.

This document provides specific information about the TD European Index Fund. It should be read in conjunction with the rest of the simplified prospectus of the TD Mutual Funds dated July 21, 2010. This document and the document that provides general information about the TD Mutual Funds together constitute the simplified prospectus.

We may change the Fund’s investment strategies at our discretion without notice or approval.

What are the risks of investing in the Fund?

Risks of investing in the Fund may include:

- commodity risk
- concentration risk
- derivatives risk
- equity risk
- foreign currency risk
- international market risk
- large investor risk
- repurchase and reverse repurchase agreements risk
- securities lending risk
- series risk
- specialization risk
- tracking risk

These and other risks, which may also apply to the Fund, are described under the heading *Fund-specific risks* in the first part of the document.

Who should invest in the Fund?

The Fund may be suitable for medium to long-term investors who:

- want to track the returns of a major European equity index
- are contributing to the growth component of a diversified portfolio
- are willing to accept a moderate level of risk

TD European Index Fund

Distribution policy

The Fund distributes net income and net realized capital gains annually in December.

Fund expenses indirectly borne by investors

Mutual funds pay for some expenses out of fund assets.

That means investors in a mutual fund indirectly pay for these expenses through lower returns.

The table below is intended to help you compare the cumulative cost of investing in this Fund with the cost of investing in other mutual funds. This example assumes that: (i) you invest \$1,000 in units of the Fund for the time periods indicated; (ii) your investment has an annual 5% return; and (iii) the Fund's MER for the Series units during the 10-year period remains the same as that incurred in its last financial year.

Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 year	3 years	5 years	10 years
Investor Series (\$)	9.94	31.34	54.94	125.06
e-Series (\$)	4.92	15.51	27.19	61.88

See *Fees and expenses* in the first part of this document for more information on the costs of investing in the Fund that are not included in the calculation of the MER.

Additional information

The Fund is not sponsored, endorsed, sold or promoted by MSCI, any of its affiliates, any of its information providers or any other party involved in, or related to, compiling, computing or creating any MSCI Indexes (collectively, the "MSCI Parties"). The Fund has not been passed on by any of the MSCI Parties as to its legality or suitability with respect to any person or entity. None of the MSCI Parties makes any warranties or bears any liability with respect to the Fund. Without limiting the foregoing, none of the MSCI Parties makes any representation or warranty, express or implied, to the unitholders of the Fund or any member of the public regarding the advisability of investing in funds generally or in the Fund particularly or the ability of any MSCI Indexes to track corresponding stock market performance.
