

TD FREEDOM V CHARGING AND BATTERY MANAGEMENT

Important

Under no circumstances should the battery be removed from the terminal. Removal could result in loss of the terminal application.

Storage

The terminal must not be stored in temperatures below 5° Celsius or temperatures above 45° Celsius.

Charging

For optimum use of the battery, keep the terminal on the charging cradle when not in use. This terminal uses a lithium-ion battery, which cannot be overcharged.

If the battery becomes drained at any time, it will require 6 hours to fully charge.
